

Not all data centers are the same.

Learn about Shakopee's newest center located in a permitted industrial zone.*

Here's what you should know about Shakopee's.

Risk Management

A number of requirements are in place to make this a risk-adverse addition to our customer base.

- 10-Year Minimum contract
- Early termination penalties
- Prepaid energy usage reduces financial risk
- UPFRONT (customer paid) expansion funding

Power Grid Stability

Current unused capacity allows for growth without taxing the grid system.

- Substation upgrades (for back up needs) are developer-funded.
- Developer pays for costs INSIDE sub-stations, whereas other developers do not.
- Customer responsible for own renewable energy generation.

Resource Responsible

SPU works to protect our natural resources and is environmentally conscious.

- Closed-loop water recycling systems required
- Expected water usage is less than .01% of the over 200M gallons used each year for residential irrigation.
- State-mandated, high-efficiency equipment installed (self-funded).
- Existing building utilized. No protected land impact.
