**SEASONAL DEMAND CUSTOMER CHARGE**

To arrive at charges to disconnect service to avoid monthly minimum demand charges:

1. Take the number of months service is to be disconnected.
2. Take the regular billing demand that would apply (which would be 60% of the highest billing demand during the preceding 11 months, or 15KW, whichever is greater).
3. Multiply number of months service will be disconnected times that regular billing demand, and that product times the regular demand charge. This amount will be divided in half, with the Shakopee Public Utilities Commission absorbing one said half.
4. The remaining said half to be paid by the customer, split equally between disconnecting order of service and reconnecting order of service, and due and payable at time of those respective events.

**PROPERTY DEVELOPMENT FEES**
